Dedicated power harness If

you leave the OBDÿ adapter attached to the OBD2 port of your vehicle, you may run into problems such as a dead battery when you return from a business trip for several days, depending on the battery condition at that time.

By installing our adapter and power harness set, you will be freed from the trouble of removing the adapter and turning off the power when getting out of the car, and you will no longer have to worry about the power consumption of the OBD Bluetooth adapter.

The recommended software is OBD Fusion, which is very accurate, easy to understand, and customizable. The software itself supports many vehicles. It can easily display data streams, meters, and fault diagnosis.
